#### PRESIDENT AND CEO MIKKO HELANDER:

"As a whole, Kesko's financial performance in 2014 was good despite the difficult market situation. In the food trade and the car trade, profit remained at a good level and the building and home improvement trade more than doubled its operating profit. In the home and speciality goods trade, profitability was negatively impacted by Anttila's significant losses.

Kesko's financial position remained very strong. Liquid assets totalled around €600 million at the end of the year and the balance sheet was net debt-free, which provides an excellent basis for Kesko's development. The Board's dividend proposal to the General Meeting is €1.50 per share.

Consumer demand is expected to remain weak in Finland also in the current year. The declined purchasing power is reflected in consumers' choices and price competition is tough in all product lines. In the Baltic countries and the other Nordic countries, demand is expected to develop positively. In Russia, the economic situation and purchasing power will weaken. Kesko Group's net sales for 2015 are expected to equal the level of 2014. Operating profit excluding non-recurring items for 2015 is expected to equal or fall slightly short of the level of 2014.

We will respond to the increasing competition in the grocery trade by taking new measures which will improve our competitiveness. New actions with which to put an end to Anttila's prolonged loss-making are planned. Preparatory work for the real estate arrangement continues and the arrangement is expected to be implemented during the first part of 2015, provided that the terms and conditions are acceptable to Kesko.

Kesko's strategy work is underway and Kesko will be a more focused and unified operator in the future. The weak trend in purchasing power in Finland requires Kesko to be more cost effective. Digital trade and services are a significant opportunity for Kesko to improve the existing business functions and create new services. The appointment of Anni Ronkainen as a member of Kesko's Group Management Board and Chief Digital Officer contribute to this development."

Despite the decline in net sales, profitability remained at a good level due to significant cost savings. #### **NET SALES AND PROFIT FOR OCTOBER-DECEMBER 2014**

The Group's net sales for October-December 2014 were €2,267 million, which is 4.0% down on the corresponding period of the previous year (€2,362 million). The decrease in net sales is mainly attributable to the decline in the net sales of the home and speciality goods trade and the machinery trade. In Finland, net sales were down 4.7% and 0.3% in the other countries. The net sales of the food trade decreased by 2.5%. The net sales performance of the building and home improvement trade in euros (-1.9%) was impacted by the weakening of the exchange rate of the Russian rouble. In local currencies, the net sales of the building and home improvement trade were up 3.3%. International operations accounted for 17.1% (16.5%) of the Group's net sales.

10-12/2014	Net sales, € million	Change, %	Operating profit excl. non-recurring items, € million	Change, € million
Food trade	1,119	-2.5	46.7	-1.6

The operating profit excluding non-recurring items for October-December was €61.9 million (€66.8 million) representing 2.7% (2.8%) of net sales. Profitability was improved by the good profit performance of the foreign operations of the building and home improvement trade. As a result of the decline in sales, profitability weakened in the home and speciality goods trade,

especially in Anttila. Due to enhancement measures, operating expenses excluding non-recurring items decreased by 1.9%

Operating profit was €31.7 million (€68.0 million). The operating profit includes €-30.2 million (€1.2 million) of non-recurring items. The item includes €4.2 million of personnel reduction costs related to the change in Kesko's divisional structure and a €21.0 million impairment charge on property, related to the renovation of Kesko's main office building. #### **KESKO'S STRATEGY WORK PROGRESSES**

Kesko's strategy work has been started and the strategy will be ready during spring 2015. In the future, Kesko will be a more focused and unified operator. Special focus areas in the strategy work are to strengthen sales and competitiveness, reduce the cost level through revised functions and develop digital trade and services.

#### KESKO CHANGED ITS DIVISIONAL STRUCTURE AND SEEKS MORE COMPETITIVE MULTI-CHANNEL HOME AND SPECIALITY GOODS TRADE

Kesko revised the Group's divisional structure by integrating K-citymarket Oy, the non-food part of the K-citymarket chain in the home and speciality goods division, into Kesko Food Ltd. Kesko's food trade division was changed to the grocery trade division. The separate divisions of the building and home improvement trade and the home and speciality goods trade were combined into the home improvement and speciality goods trade division.

As from 1 January 2015, Kesko Group's reportable segments are the grocery trade, the home improvement and speciality goods trade, and the car and machinery trade. Kesko publishes comparatives according to the new reporting structure on a separate release on 10 February 2015.

The change in the divisional structure is aimed to provide a uniform customer experience and improve customer satisfaction in all of the divisions' chain stores. The objective is to enable customers to have an easier multi-channel shopping experience at physical and online stores, as well as to increase competitiveness and improve profitability.

Cooperation negotiations about changes planned in Kesko's home and speciality goods trade, building and home improvement trade and food trade were started on 7 October 2014 in Kesko's home and speciality goods trade companies and building and home improvement trade companies in Finland and in Kesko Food Ltd, Kesko Corporation and K-Plus Oy. The negotiations were completed on 24 November 2014. A total of approximately 2,800 people were included in the negotiations and the combined reduction need in the companies was estimated at a maximum of 230 full-time equivalents. As a result of the negotiations, the total need for reductions in personnel was confirmed at 193 full-time equivalents. The reductions also include possible pension plans and terminations of fixed-term employments.

#### **IMPROVING ANTTILA'S PROFITABILITY**

In order to improve Anttila's profitability, a decision was made in March to close eight Anttila department stores operating in leased premises and four Kodin1 department stores and to implement enhancement measures in the central units of Anttila Oy and K-citymarket Oy. By the end of the reporting period, six Anttila department stores had been closed. In addition to the renewal of Anttila's operating activities aimed at improving profitability, the option of selling Anttila Oy is also investigated.

#### **KESKO CONTINUES PREPARATIONS FOR REAL ESTATE ARRANGEMENT**

The intention is to sell some of the store sites Kesko owns to a joint venture to be set up. The arrangement is expected to be implemented during the first part of 2015.

Kesko's objective is to set up a limited liability company (a joint venture) to own and manage mainly Kesko-owned store sites and shopping centres with Kesko as one of its significant investors. If the joint venture is set up, Kesko Group would continue operating on the store sites under long-term leases. The fair value of store sites planned to be sold to the joint venture in Finland and Sweden has been specified at a maximum of around €670 million.

Launching the joint venture depends, in addition to investor interest, on whether it is possible for Kesko to achieve such terms and conditions in the arrangement that are economically justifiable for it, taking the Group's strong financial position into account.

If implemented, the sale of store sites is estimated to generate a significant non-recurring profit, the amount of which will be specified as the examination progresses.

#### **RISK MANAGEMENT**

Risk management in Kesko Group is guided by the risk management policy confirmed by Kesko's Board of Directors. The policy defines the goals and principles, organisation, responsibilities and practices of risk management in Kesko Group. The management of financial risks is based on the Group's finance policy, which is confirmed by Kesko's Board of Directors. The business division and Group managements are responsible for the execution of risk management. Kesko Group applies a business-oriented and comprehensive approach to risk assessment and management. This means that key risks are systematically identified, assessed, managed, monitored and reported at the Group, division, company and unit levels in all operating countries.

Kesko Group's risk map is considered by the Kesko Board's Audit Committee in connection with the quarterly interim reports and the financial statements. The Audit Committee Chair reports on risk management to the Board as part of the Audit Committee report. The Kesko Board considers Kesko Group's most significant risks and uncertainties and their management responses, and assesses the efficiency and performance of risk management at least once a year. The most significant risks and uncertainties are reported to the market by the Board in the Report by the Board of Directors and any material changes in them in the interim reports.

The following describes the risks and uncertainties assessed as significant.

#### SIGNIFICANT RISKS AND UNCERTAINTIES

The geopolitical situation, the weak outlook for the Finnish economy, increases in taxes and public payments resulting from the indebtedness of the public sector, coupled with increasing unemployment, weaken purchasing power and consumer confidence and may cause a long-term decline in the level of demand. This would have negative repercussions especially on the home improvement and speciality goods trade and the car and machinery trade in Finland. In the food trade, price is increasingly important.

The level of uncertainty around economic development in Russia is high and political and country risks in Russia have risen significantly. The fall of crude oil prices cuts the revenues of the Russian state. The decline in the rouble's exchange rate weakens purchasing power, demand and profitability, and increases hedging costs. The economic sanctions imposed by the EU and the USA make it difficult to get financing in Russia. Russia's counter-sanctions have impacts especially on food stores' operations and raise the price level in Russia even on a wider scale. Corruption, unpredictability of officials and rapid changes in laws and their application, as well as unexpected changes in the operating environment make business operations more difficult and, if continued, will delay or, at worst, prevent expansion.

E-commerce and online services are becoming increasingly popular in the retail trade, especially in the home technology, sports and other speciality goods trade. International e-commerce increases price transparency and consumers' alternatives at the same time when buying and marketing of products and services become more personalised and increasingly take place online. Buying decisions are often made based on information available on the web. The risk is that the progress of e-commerce and e-service development projects is outpaced by competitors, or that competing online stores and e-services are found more attractive by customers. For the food trade, the challenges in the development of e-commerce include cost effectiveness of logistic models and the suitability of the existing store sites for e-commerce.

In the retail trade, it is essential to succeed in the development of concepts so that they meet the needs and preferences of local customers. The change in the trading sector and customers' purchasing behaviour requires continuous renewal. The growth of e-commerce has cut the sales of the department store trade and there has been a failure to renew Anttila's concept and selections fast enough. The sales and profitability of the building and home improvement stores in Sweden and Intersport stores in Russia have failed to reach the targets. In the Finnish food trade, it is increasingly challenging to meet the market share targets as price competition increases.

Kesko's chain operations are, contrary to most competitors, based on a retailer business model to a significant extent. The competitive advantages of the retailer business model include the retailer's local expertise and ability to rapidly respond to changes in customer needs or competitive situations. Decision-making concerning the development of the chains' operations and the implementation of changes in business operations can, however, be outpaced by competitors. A prolonged decline in the level of demand and sales can weaken the profitability and performance of retailer operations.

The Finnish competition legislation has been amended to the effect that, unlike in the rest of the EU area, the prohibition of abuse of dominant market position can be applied on companies whose national market share in the groceries retail markets exceeds 30 percent. According to the law, Kesko Food is in a dominant market position. Special obligations have been imposed on a company in a dominant market position which can weaken the trading sector's competitive opportunities to serve customers and operate efficiently. The implications of dominant market position are partly open to interpretation. An erroneous interpretation may result in monetary penalties, liability for damages and weakened reputation.

The trading sector is characterised by increasingly complicated and long supply chains and a higher dependency on information systems, data communications and external service providers. Failures in information systems and the transfer of payments, or in other parts of the supply chain can cause significant losses in sales and weaken customer satisfaction.

With the view of increasing the market share, good store sites are a key competitive factor. The acquisition of store sites can be delayed by zoning and permit procedures and the availability and pricing of sites. Considerable amounts of capital or lease liabilities are tied up in store properties for years. When the share of e-commerce grows, the market situation changes, or a chain concept proves inefficient there is a risk that a store site becomes unprofitable and operations are discontinued while long-term liabilities remain.

A failure in product safety control or in the quality assurance of the supply chain can result in financial losses, the loss of customer confidence or, in the worst case, a health hazard to customers.

The implementation of strategies and the achievement of objectives require competent and motivated personnel. There is a risk that the trading sector does not attract the most competent people. A growing need for special competencies increases the dependency on individual expertise and the key person risk.

In divisions strongly dependent on individual principals and suppliers, such as the car and machinery trade, ownership arrangements and changes in a principal's or supplier's strategy concerning product selections, pricing and distribution channel solutions can mean weakened competitiveness, or a loss of sales or business.

Crimes are increasingly committed through data networks and crime has become more international and professional. A failure especially in the protection of payment transactions and personal information can cause losses, claims for damages and endanger reputation. There is a risk that controls against such crime are not sufficient.

Different aspects of responsibility, such as ethicality of production and the supply chain, fair and equal treatment of employees and environmental protection are increasingly important to customers. Possible failures of responsibility would result in negative publicity for Kesko. Kesko's challenges in responsibility work include communicating its responsibility principles to customers, suppliers and retailers, and ensuring responsibility in the supply chain.

Compliance with laws and agreements is an important part of Kesko's responsibility. Non-compliance can result in fines, compensations for damages and other financial losses, and a loss of confidence and reputation.

Kesko's objective is to produce and publish reliable and timely information. If some information published by Kesko proved to be incorrect, or communications failed to meet regulations in other respects, it could result in losing investor and other stakeholder confidence and in possible sanctions.

Accidents, natural phenomena and epidemics can cause damages or business interruptions which cannot be prevented. There is also the risk that insurances do not cover all unexpected accidents and damages. Other risks and uncertainties related to profit performance are described in the Group's future outlook.

#### **FUTURE OUTLOOK**

Estimates of the future outlook for Kesko Group's net sales and operating profit excluding non-recurring items are given for the 12 months following the reporting period (1/2015-12/2015) in comparison with the 12 months preceding the reporting period (1/2014-12/2014).

The general economic situation and the expected trend in consumer demand vary in Kesko's different operating countries. In Finland, demand in the trading sector is expected to be weak also in the current year and the competitive situation is expected to tighten further, especially in the grocery trade and the home and speciality goods trade. In Sweden and Norway and in the Baltic countries, the growth in demand in the trading sector is expected to continue. In Russia, the economic situation and consumers' purchasing power will weaken.

Kesko Group's net sales for 2015 are expected to equal the level of 2014. Operating profit excluding non-recurring items for 2015 is expected to equal or fall slightly short of the level of 2014.

#### PROPOSAL FOR PROFIT DISTRIBUTION

The parent's distributable profits are €1,084,158,672.62, of which the profit for the financial year is €16,269,287.26.

The Board of Directors proposes to the Annual General Meeting to be held on 13 April 2015 that a dividend of €1.50 per share be paid on shares held outside the company at the date of dividend distribution. No dividend is paid on own shares held by the company as treasury shares at the record date of dividend distribution.

At the date of the proposal for distributions of profits, 9 February 2015, a total of 99,024,437 shares were held outside the Company, amounting to a total dividend of €148,536,655.50.
