## Future outlook

Estimates of the future outlook for the Kesko Group's net sales and operating profit excluding non-recurring items are given for the 12 months following the reporting period (7/2013-6/2014) in comparison with the 12 months preceding the reporting period (7/2012-6/2013).

Resulting from the problems of European national economies, the future prospects for the general economic situation and consumer demand continue to be characterised by significant uncertainty. In consequence of weakened employment and consumers' purchasing power, the growth prospects for the trading sector remain weak.

In the Finnish grocery trade, the market is expected to remain stable. As a result of the weakened economic situation, the demand in the home and speciality goods trade, the building and home improvement trade and the car and machinery trade is expected to remain weak.

The Kesko Group's net sales and the operating profit excluding non-recurring items for the next twelve months are expected to remain at the level of the preceding twelve months.
