The comparable operating profit has been calculated by deducting items affecting comparability from the reported operating profit.

## GUIDANCE 2022

Kesko Group's guidance is given for the year 2022, in comparison with the year 2021. Kesko estimates that its comparable operating profit in 2022 will be in the range of €790 – 840 million. Before, the company estimated that the comparable operating profit would be in the range of €750 – 840 million. In 2021, Kesko's comparable operating profit totalled €775.5 million.

## OUTLOOK FOR 2023

Kesko's net sales and operating profit are expected to remain at a good level also in 2023 despite the challenges in the company's operating environment.

The grocery trade market is expected to remain stable as a whole, in part supported by price inflation. Kesko is a strong operator in all areas of food trade. Consequently, operating profit is expected to remain at a good level despite rising costs.

The construction market is expected to decrease somewhat compared to 2022. New building construction is expected to decrease, but renovation building and construction related to the green transition are expected to continue to grow. B2B trade accounts for over 80% of the sales for Kesko's building and technical trade division. Good profit levels in building and technical trade are underpinned by the significant share of renovation building and the strong demand for products related to saving energy and the green transition.

In the car trade market, the availability and demand for cars are expected to remain below their long-term average in 2023. Despite the market situation, profitability in Kesko's car trade division is expected to remain at a good level thanks to the transformation and efficiency measures carried out.

## PRESIDENT AND CEO MIKKO HELANDER:

Kesko's Q3 result in 2022 was the best quarter result in the company's history. Our quarter-result has now improved on its comparison period for 14 consecutive quarters. Net sales grew by 3.4% in comparable terms, totalling €3,010 million. Our comparable operating profit totalled €243 million, representing an increase of €6.4 million. The results achieved act as strong proof of Kesko's uniqueness as a trading sector operator and the effectiveness of our strategy also in a post-pandemic market.

In food trade, profit improved thanks to good performance in Kespro and our grocery stores. The division's sales continued to grow, and its net sales totalled €1,574 million and operating profit €133.4 million. The operating profit improved thanks to sales growth in both Kespro and the grocery stores. Kespro's performance was particularly strong, with sales growth of over 15%. Consumer online grocery sales also grew by 3.4%. Online growth is also supported by the extensive collaboration we have launched with Wolt. We have focused more on the price-competitiveness of our grocery stores and have ranked well in price comparisons in the media. K Group grocery stores are the only ones on the market that offer both bargains and premium under one roof.

In the building and technical trade division, all businesses delivered good results. Growth continued and profit strengthened in B2B trade. The division's net sales grew by €70 million and totalled €1,203 million. The growth was attributable to good performance in B2B trade. Sales growth was particularly strong in technical wholesale, where volumes grew especially robustly in the heating and energy product categories. In Finland, both Onninen and K-Rauta recorded strong results. In Norway, profitability was good for both Onninen and Bygghakker. The result in Sweden was good thanks to B2B-focused K-Bygg, Onninen and MIAB. B2B trade now accounts for over 80% of the division's sales.

In the car trade division, profitability remained good despite availability issues. Net sales decreased due to issues with new car deliveries. Profitability was at a good level thanks to better sales margins and efficiency measures, and the operating margin stood at 5.5%. The share of electric cars is growing forcefully in passenger car sales. Our K Charge EV charging network is expanding, and charging has more than doubled in a year.

We estimate that the outlook for Kesko's business will be positive also in 2023. All three business divisions are making a good profit. Kesko has an exceptionally strong position in all areas of Finnish food trade, and we are doing well also in a price-driven market. K Group is the leading operator in technical wholesale and building and home improvement trade in Northern Europe, with total retail and B2B sales of over €6.7 billion. The green transition, efforts to improve energy-efficiency, and growing renovation building are set to keep up demand also

going forward. Kesko estimates that its comparable operating profit in 2022 will be in the range of €790 – 840 million. Kesko's net sales and operating profit are expected to remain at a good level also in 2023 despite the challenges in our operating environment.

## SEGMENTS

### SEASONAL NATURE OF OPERATIONS

The Group's operating activities are affected by seasonal fluctuations. The net sales and operating profits of the reportable segments are not earned evenly throughout the year. Instead, they vary by quarter depending on the characteristics of each segment. In terms of the level of operating profit, the second and third quarter are the strongest, whereas the impact of the first quarter on the full-year profit is the smallest.

The Board was authorised to decide, if necessary, on new dividend payment record dates and pay dates for the second, third and/or fourth instalments, if the rules and statutes of the Finnish book-entry system change or otherwise so require. The remaining distributable assets will remain in equity.

The resolutions of the Annual General Meeting were communicated in more detail in a stock exchange release on 7 April 2022.

## SUSTAINABILITY

The sustainability strategy published in spring 2022 sets clear sustainability targets for the operations of Kesko and its three divisions. The focus areas of the strategy are climate and nature, value chain sustainability, people, and good governance.

Progress is measured with sustainability indices and assessments, including the Dow Jones Sustainability Indices, MSCI ESG, Sustainalytics, and CDP.

### KEY TOPICS IN Q3:

The Kesko Sustainability Hour investor event held in August focused on sustainability themes. Members of Group Management Board explained how the updated sustainability strategy is reflected in Kesko's business operations, and how sustainability can also create cost savings and new business opportunities.

Kesko mapped out proactive measures to reduce electricity use in its stores, offices and warehouses to reduce peaks in electricity consumption and help prevent potential electricity shortages in Finland this winter. The measures could help temporarily save electricity by as much as 20%.

Charging of electric vehicles at Kesko's K Charge stations was record high this summer and more than doubled in July compared to the year before. Volkswagen was the most registered brand of all-electric passenger cars in Finland in January-July, and demand for electric cars now exceeds that of traditional models in K-Auto stores.

## RISK MANAGEMENT

The objective of risk management is to support Kesko in achieving targets and implementing strategy. Risk management in Kesko Group is an essential part of internal control and guided by the risk management policy approved by Kesko's Board of Directors. The policy defines the purpose and principles of Kesko Group's risk management, as well as the related steering model and responsibilities. In the management of financial risks, the Group's treasury policy, approved by Kesko's Board of Directors, is observed. The management of business operations and common functions are responsible for the execution of risk management. Strategic risks at Kesko Group are identified and assessed as part of the strategy process. Risks related to climate change are assessed applying the Task Force on Climate-related Financial Disclosures (TCFD) recommendations. In assessing climate risks, the Group utilises selected scenarios for the future that enable identifying and assessing transitional and physical risks and opportunities significant for the strategy. The likelihood and impact of strategic risks is assessed not only for the strategy period but also in the medium term (3-5 years) and long term (over 5 years). Operational and financial risks related to achieving strategic targets are assessed in the short term (1-2 years), using loss scenarios, simulation and stress testing. The purpose of risk management is to ensure that key risks are systematically identified, assessed, managed, monitored and reported as part of business operations at Group, division, company and function levels throughout the Group.

Kesko's risk appetite is driven by its strategy, vision and value and its risk tolerance and risk bearing capacity. The risk tolerance and risk bearing capacity are assessed and tested at regular intervals based on selected financial figures and indicators and loss scenarios. Kesko's risk appetite is divided into three categories depending on the risk assessed. Risk appetite is considered low in cases where it does not involve significant financial or business opportunities (e.g. risks related to personnel and customer safety). Risk appetite is considered moderate with risks where the Group is able to optimise the cost-efficiency of risk management (e.g. property risk and business disruption risks). High risk appetite is limited to risks that also involve significant opportunities. Risk appetite is also materially impacted by the likelihood of realisation and related financial impacts.

The Group's most significant risks and uncertainties, as well as material changes in, responses to, and indicators for them are reported to the Kesko Board's Audit Committee quarterly in connection with the review of interim reports, the half-year financial report, and financial statements. The Audit Committee Chair reports on risk management to the Board as part of Audit Committee reporting. The most significant risks and uncertainties are reported to the market by the Board in the Report by the Board of Directors and any material changes in them in the interim reports and the half-year financial report.

The most significant changes in risks are related to Russia's growing aggression in Ukraine and Europe, cyber security, a potential inflationary spiral, the availability and price of energy, weak consumer and business confidence, rising interest rates and tightened financing, lower investment levels, and a global slowdown in growth.

The most significant risks for the Group continue to be a weakening in demand in building and technical trade, and tightening price competition in grocery trade. In car trade, the biggest risks are related to the availability of cars and spare parts. New risks include potential power outages this winter, and the impact of inflation on expenses.

### Legal disputes and possible legal proceedings

Group companies act as plaintiffs, defendants or parties to certain legal proceedings, disputes or investigations related to the Group's business operations. Although according to Kesko's management's estimate, the outcome of pending disputes and legal and authority proceedings is unlikely to have any material impact on the Group's financial position, the outcome of disputes and legal and authority proceedings is difficult to predict.

Investigation by the Finnish Competition and Consumer Authority regarding Onninen Oy – The Finnish Competition and Consumer Authority has been investigating Kesko Group company Onninen's suspected violation of competition law for almost 10 years, and finally decided on 8 September 2022 to take the matter to the Market Court. The investigation has concerned a wide range of companies operating in the HPAC infra plastic pipe product market in Finland. The FCCA proposes a penalty payment of €16 million for Onninen for the alleged infringement. The suspected violation concerns almost in its entirety a period of time before Kesko acquired the capital stock of Onninen from Onvest Oy on 1 June 2016. Consequences resulting to Onninen from the investigation were addressed in the acquisition terms and conditions. Onninen denies the FCCA claims of suspected violation of competition law as unfounded. Kesko is not suspected of participation in the alleged infringement.

Legal proceedings concerning UAB Kesko Senukai Lithuania – Kesko has disclosed, for example in its financial statements for 2021, that it was party to two legal proceedings concerning the shareholder agreement of Kesko's joint venture UAB Kesko Senukai Lithuania and the disagreements concerning the management and development of the company and its subsidiary. The other parties to these legal proceedings have included, for example, the minority shareholders of UAB Kesko Senukai Lithuania. Both legal proceedings have ended. The minority shareholders have started a new legal proceeding against Kesko concerning the shareholder agreement of UAB Kesko Senukai Lithuania.

### Calculation of performance indicators

Kesko uses alternative performance measures to reflect business performance and profitability. These indicators should be examined together with the IFRS-compliant performance indicators.

Change in comparable net sales is used to reflect changes in the Group's business volume between periods. The indicator reflects the change in net sales excluding the impact of acquisitions and divestments, in local currencies. The comparable net sales have been calculated by including in the net sales the business operations that have been part of Kesko Group in both the reporting period as well as the comparison period. Other structural arrangements related to acquisitions and divestments have been adjusted in the same manner as acquisitions.

Performance indicators reflecting comparable profit and profitability are used to improve the comparability of operational performance between periods. Gains and losses on disposal of real estate, shares and business operations, impairment charges and significant restructuring costs are identified as items affecting comparability. Gains on disposal have been presented within other operating income, and losses on disposal within other operating expenses in the income statement.

Alternative performance measures that have been adjusted for the impact of IFRS 16 are used to monitor the achievement of certain financial targets. The EBITDA excluding the impact of IFRS 16 corresponds to EBITDA before the adoption of IFRS 16, and the interest-bearing net debt excluding lease liabilities correspond to interest-bearing net debt before the adoption of the standard. These restated indicators are included as components in the Group's financial target "interest-bearing net debt excluding lease liabilities divided by EBITDA excluding the impact of IFRS 16".

In addition, financial performance indicators for the Group have been presented as alternative performance measures. The management uses these indicators to monitor and analyse business performance, profitability and financial position.
